

ICHINOSEKI

2024 Ichinoseki City Outline

Mayor of Ichinoseki City Yoshihito Sato

SDGs Future City Ichinoseki

Located near the center of the Tohoku region, Ichinoseki has long prospered as a vital transportation hub between southern Iwate Prefecture and northern Miyagi Prefecture.

Ichinoseki refers to the area between southern Iwate and northern Miyagi as "central Tohoku," and city administrations within have advanced in an effort to develop the entire region while competing with one another.

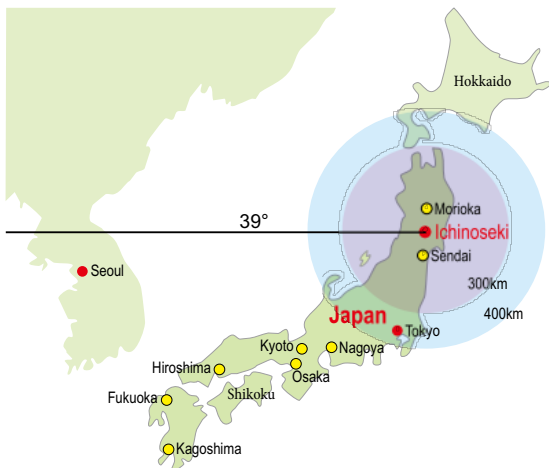

Ichinoseki is expanding cooperation with neighboring local governments of Hiraizumi as well as Miyagi Prefecture's Kurihara, Tome, and Kesennuma, as they operate in the same domain of daily life, irrespective of prefectural boundaries.

The city's comprehensive plan prioritizes the "International Linear Collider (ILC)," an international project that has the potential to significantly change Tohoku's and Japan's future.

Ichinoseki is committed to building a sustainable region based on the SDGs, where the next generation may pursue an active role with pride, hope, and dreams.

In May 2021, Ichinoseki was selected as an "SDGs Future City" in recognition of its exceptional efforts toward achieving the SDGs.

Accurately grasping the shifts in the social climate in our city, the people of Ichinoseki come together to create a happy tomorrow for coming generations, advancing to fulfill the city's future vision: "Let's find and nurture the treasures of our hometown, radiating life in Ichinoseki."

Blessings of carefully nurtured land and technique

Establishing agricultural product brands that make use of the blessings of nature and the special characteristics of the region, as well as actively supporting and nurturing the next leaders.

Iwate Minamigu beef

Carefully raised from calves through careful selection of feed-stuff such as high quality rice straw and hay. "Iwate Minamigu" has a carcass grade of A3 or higher with its outstanding full flavor and beautiful marbling.

Konjikinokaze rice

"Konjikinokaze" is a delicious brand of rice that has been developed for over 10 years.

Summer/autumn vegetables

Ichinoseki produces summer/autumn vegetable such as tomatoes, eggplants, green pepper, cucumbers and mini tomatoes at the same time which is rare, even in Japan.

Floret chrysanthemum

Small chrysanthemums of vivid coloring grown in a cool climate. The top producing region in the prefecture.

Magarinegi green onions

Transplanted onto a slant so that the white part of the root grows longer, and harvested in the early winter to get an even better flavor.

Nambu Ichiro Kabocha

Local pumpkin grown in the Honedera Village Estate and has a sugar content of over 15.

Data on Ichinoseki City
